

ESTACA FORMULA TEAM

PARTNERSHIP PLAN

Discover student motorsport

OUR HISTORY

The ESTACA Formula Team was created in 2010 by 5 students from the ESTACA engineering school in Saint-Quentin-en-Yvelines (France), with the primary objective of participating in Formula Student competitions. Since its inception, our association has produced 5 internal combustion engine single-seaters. Now, a new era is beginning within the association: the electric era!

THE TEAM

Today, the team consists of 60 members divided into 4 technical divisions, organized in a manner similar to a company. We design, manufacture, and operate our own single-seaters, from the initial concepts to the final days of competition and beyond. All our members are motivated and ready to take on the challenge of electric vehicles that we will face in the coming years in order to compete with the best teams in the world.

THE FORMULA STUDENT

600+ teams in the world

46 nationalities

24 competitions

5 continents

Formula Student is an international engineering and motorsport competition dedicated to students. The teams must adhere to a specific technical and sporting regulation to produce their own single-seater race car to compete on circuits around the world. The competition values both our engineering approach and our performance.

2024 SEASON

FS SPAIN

Circuit de
Barcelona-Catalunya

Association's points record

FS ALPE ADRIA
Bugatti-Rimac Test Track

Endurance event completed

 **2nd place** in Business Plan CV (FSAA)

THE ELECTRIC CHALLENGE

The challenge for the 2024-2025 season is the design and manufacturing of our association's first electric single-seater. Its name is EC-05! Powered by an **electric** powertrain, it aligns with a sustainable approach while training our members in future technologies.

This challenge is ambitious, both technically and financially. That is why we are reaching out for your support, as committed actors in the energy transition who are eager to support students in a project that will prepare them for their future careers, potentially within your companies.

THEY TRUST US

AN IMPORTANT VISIBILITY

We offer our partners significant visibility by featuring them on our social media channels. Our audience consists of young engineering students as well as automotive industry partners. All our posts and communications are accompanied by photos and videos produced by professionals, and we take great care in ensuring the quality of all our content.

125 000 +
Monthly interactions

Additionally, we regularly organize and participate in major events related to the automotive industry (such as the Paris Motor Show and GP Explorer).
